**Subject:** missing stock

Gentlemen, I am working an IAV for \$180,000.00. nsn is 5985-01-506-5380, loss of 2 ea. We have 2 outstanding stows on this nsn that were supposed to go to DR27E1B51 that need either found or zero stowed. That location and other deleted locations are empty as of today. I can't complete my IAV until this is done. There was the original loss for 2 ea that I have, but now there is a gain for 2 ea, because of the outstanding stows. There are also 2 mros that were denied because of this. This action will continue until action on your end is completed. The material was inducted on June 17, 2016. Any help locating the lost material or zero stowing stock will discontinue the process. Both receipts were processed in receiving. Ocn's are YXZF5C4 and YX9M2RY. Questions or comments, feel free to contact me. thank you, Gary

Subject: RE: Evidential Matter Request Summary

The ION that was being used for Audit Readiness as established by DLA Distribution was discontinued several months ago due to the claim of being Audit Ready.

Since then, I have suggested that anyone believing they are doing Audit Readiness related to use 60002ZSTND (Distribution Standardization) or 60003ZNSTD (Standardization Operations).

As per guidance from Colonel New, please ensure that the time Mr. Fisher spent on this EM request is properly coded in Eagle. Not sure if there is an ION assigned for Audit Readiness yet, but I would be willing to bet Mr. Buchanan would have better guidance.

Subject: Evidential Matter Request Summary

Good morning Gentlemen,

In response to COL New's question on Friday's DCS concerning the amount of time/personnel put into the latest EM Request, I have obtained the following information:

1 person worked on it (Harry Fisher). From start to finish (including a follow on request to rename all files that were loaded into the RC tool) the total cost of the request was 3 total hours for 12 documents. Obvious rate of 4 per hour or about 15 minutes each to hunt down, load into the tool, and name. I would like to point out that there was an issue where the documents on the spreadsheet were not matching up with the NSN or the OCN, so the employees had to go into DSS and look them up in the induction screen to find the right paperwork...which indicates that it could potentially take less time.

I will continue to monitor each request in the future to look for enough data to assist in planning for future requests

Shane

You have the OT until the end of September.

The supplies have always been on hand thousands of locations were relabeled, what changed over the months since was a DSS update changing the print size.

Lisa, please expedite this order, thank you.

R/S,  
Paul Finn

Subject: EMERGENCY ORDER: Bin Labels

Lisa/ Tim,

The command recently approved 2,000 hours of Overtime for us to use to get the bin labels applied (many location lack them currently in the Racks and Bins).

However, this approval was gained very quickly - prior to us actually having the supplies to start the project.

To support this and not lose the hours, I need to expedite this order ASAP.

Attached is the 1901 for these - please positively confirm when the PO has been cut/ these have been ordered, and when we can expect them to arrive.

This is from the approved vendor in MD, so turnaround is expected quickly from them.

Please contact me with any clarifying questions.

Thanks,

Shane L. Mantz

Shane & All,  
Work Force Mgmt and Training Mgmt, collectively worked this action and have identified all supervisors of record for our DDSP deaf employees.

The attached email was sent out to those supervisors already today (attached) to inform them of the upcoming training. If there has been a change of supervisor (either due to move of a sup or move of the employee) Work Force Mgmt was not made aware and would require notification of such move.

Don't we have a list of these employees somewhere?

Maybe in the HR/ People leader area?

I don't have all my team here today, and I don't think this information is flagged anywhere I can research (please advise if there is a way).

Perhaps workforce management would have a list of these employees and their assigned supervisor/ we can easily provide the supervisor if we know the list.

Thanks,  
Shane

Shane,

Thank you for your responses, looks like things are moving forward for DB40 and DK, Lester has sent me an update on MustDo's, they did capture a few today.

Thank You,

Shane, Fran,

We'll forgo the meeting today, if any pressing issues I'll let you know. Do you have any pressing issues you'd like to discuss?

Just a few notes:

Overtime continue on current path. (labeling, Supervisor/Mgmt.) coverage.

\*\*\* Roger

Supervisor meetings Thursday and Friday, please have coverage on Thursday so all KB Supervisors/Mgmt. can attend.

\*\*\* Roger

George let's revisit the game plan for CCP backlog.

PDO Fran continue moving forward with containers, any roadblocks let me know, appears all are on board.

DK Shane did you touch base with Chief Johnson with her concerns?

\*\*\* Meeting today at 2pm

DB40 any word back from Mr. Cornelius?

\*\*\* Yes - we just need to have all current trained employees review both the Hyster and Raymond user manuals, and have sign in sheets for those different models - no extra training required. Met with Shawn Thomas on Friday, we have 2 names we're going to train initially to own the project (Both KD shift, since Monday's are light attendance days). Will start project first week in NOV.

MustDo's are we capturing the 10 day old listed today?

\*\*\* Tracking - Sabrina is out today, but Lester is following up on them. They've been working it from this morning.

I'll touch base with Drew to set a date for the GS-11 interviews.

Thank You,

Got it, I think I saw a response from Lester.

Zero Stows are one of the topics of conversation with Karen today - I believe 30 days required to zero stow is more detrimental than helpful, for reasons like this.

Gentleman, there is an open Rewarehousing Stow that is over two weeks old. This has caused a denial for 1476 ea. The open rewhs stow has also created a B/B gain for 1476 ea. This loss/gain cycle will continue until the stock is found or a zero stow is processed.

Location on record is DR08G6B31 (where stock is rewarehoused to) was checked by me this morning. 50125832D1 (where material was coming from) was also checked. Info is as follows.

Good morning Paul,

By the end of August, I have provided all the labels to complete marking locations in Isles DB46 - DB51. That can open up two full rows (DB46 & 47) for RBEs and all RBGs & RBLs.

Please give me as much advanced notice as you can if you'd like to have the labels for DB41-45.

Thanks,

Sam Jodon

Subject: RE: Daily Stock Positioning Report:10-12-16.xlsx

John,

Concur - Ky and I talked it today.

I'd prefer to label and activate the highest levels in DB40 for G-pop, as time studies indicate it is far less productive to travel up/ down on a Stock Selector vs. forward/ backward.

I think we could get the necessary aisles labeled in a couple weeks. Depending on validating the current "Trained" status of KA/KD/KB for the different Stock Selectors in DB40, we could begin Monday, 10/31 if we have sufficient operators in place (4 per shift).

I've heard that perhaps the labels to label the remaining locations were already printed, so that shouldn't be an issue. If we can't locate them, we do have some 2x4 labels from the Bin re-label project that should suffice.

BREAK

Mike Cornelius - How long would it take to get 12 employees trained/ certified on the Raymond Stock Selectors we have in DB40?

Do we have a list of currently trained to operate those different SS in DB40?

Is there a different training required for these vs. the ones currently in operation?

Thanks,  
Shane

Paul and Shane,

We can increase rewarehousing looking at several of moves within the EDC (CMB) to extend to Mechanicsburg (DB Older LAC G to V0), East Bulk (DR LAC G to 85-5), High-rise In aisle combinations (You have received some these already mainly in DR), and DB40 (DB Newer LAC G to V0).

For DB40 we will have to change the LAC in some rows to accept the G materiel. I would suggest putting this stock in a less desirable area within DB40.

V/r,  
Ky

Paul,

Talked with Ky last week and he mentioned that each quarter the pop codes get updated, thus why we're now at over 69k of G pop in the high rise.

With workload being so low yesterday, is there any reason why we're not augmenting our workload with REWs to clear out the space that is needed in the High Rise and get the G-pop out? Whether it be to a outer warehouse or DB40, we really need to attack this G-Pop to create the RBEs and RBLs that are still in very high demand and are driving unwanted active stock to DB40.

Is dropping my own REW work something I can get permissions to do? Is it something I really want to take on, or will the gain in control over our own destiny just cause more headaches near term for me?

Any thoughts/ ideas on how we take advantage of those sporadic lulls that happen, and ensure we have daily touch points with PPC to ensure we're keeping everyone busy/ engaged, and meeting our space needs?

Thanks,  
Shane

Shane

I always recommend completing an SF71. I complete one when I take leave. Don't think it's unreasonable to fill out. James always sent me one when taking leave.

Subject: FW: SF71's

Aren't we supposed to be following the SF-71 process?

This morning James stopped me and questioned as to why I was making him fill out SF-71's but not Lester, insinuating I'm singling him out and treating him differently, so I sent them this.

I then followed up with Lester, and he said that Management doesn't do SF-71's and it's not required or documented as needing to be required anywhere.

I told him that I had done them for my time off in Utah and that as far as I was concerned, following the process is required and the only way to CYA when disputes about approved leave vs. not approved leave, etc, as well as having proper documentation to support use of Annual and Sick Leave.

Please advise so we're all on the same page.

Thanks,  
Shane

As previously agreed upon, Storage will provide the labor to do this work and requested support from DMD to provide the oversight.

I am currently short 4 supervisors, have a backlog, and do not have the ability to oversee/ serve as a POC/ Project manager to do coordination.

Sam - are you able to provide this interface?

Thanks,  
Shane

Lori, This PO to Grainger is being finalized and I do not have a definitive answer yet but the unofficial PO shows a 10/17 delivery date for the boxes. I was waiting for a for sure answer but this should suffice for your needs. Thanks.

I am confused on your comment below because UNICOR and DLA both are in agreement that the boxes were never installed. Mr. Cullen had walked the area and verified that the boxes were not installed shortly after the contractor left the job. I have not heard any input from UNICOR on what happened and why the contractor left without finishing the job.

 > I spoke with Mike Cullen and he sent me the information he has pulled together to this point. It seems as all the material was sent and received at the location, but at this point we are not sure what happened to the product. This should have been noted prior to the installers and customer signing off on this. Was a final walk through completed and were the missing bins noted on the report? I do not have a copy of that.  
 >  
 > Unfortunately, we are unable to contact the installers due to their current situation. I want to make this right for both parties but we are talking about an estimated \$26,000 of "missing" product.

> Sir,  
>  
> There is currently a situation with a rack project at New Cumberland. This project is for a project which occurred mainly during the 2015 calendar time period. Basically, the rack installation was complete but the corrugated cardboard bin boxes were never "fully" installed. Even though there were changes to the configuration, enough bin boxes were ordered to complete the project. The DLA project engineer was informed by UNICOR that additional funding is required to complete the project. Basically, DLA would be paying twice for the bin boxes and installation. Could you review the situation and let me know what is required to resolve the situation? It has now been lingering on for months and my customer cannot fully utilize the rack system.  
>  
> Myself and the DLA project engineer, Ms. Lori Smith-Mitchell, are available to discuss the situation with you.  
>  
> Greatly appreciate your time and attention to this matter.

Good morning,

Could we please get the word out to the supervisors that team members working OT are to come prepared. We had many team members whom did not have the proper tools (knife, stapler, tape dispenser, etc..) and no DSS access.

Subject: Audit Readiness: Latest Inventory Profile and DLA Distribution: Susquehanna, Richmond, and Norfolk site visits with E&Y

Importance: Low

All,

Attached is some refreshed Information - for you to save to your desktop/print in your AR mgmt books.

During our onboarding, E&Y wanted the Percentage of DLA owned materiel that is less than or equal/greater than \$1K dollars, since it is the key for our regulatory inventories. Please see the attached refreshed DLA inventory profile chart and you may want to print this and have it in your management book that we discussed during the CDRs Ldrshp training. Also attached is the electronic 2016 Controls file - to save to your desktop and re-print (it is the one we used as a hand-out at the CDRs Ldrshp training).

Last - sharing the 'final' itineraries with all other Dist. Centers - so you see how this first visits will go with Susq, Richmond, Norfolk.

We only got 271 total hours signed up for Saturday.

Are we going to open it up to After shift tomorrow night, before shift Fri and before shift Sat?

Can we repost the sheets tomorrow and see who else might sign up?

Sunday doesn't look like an option with the electrical work happening.

Thoughts?

Subject: FW: SME's - 3rd Request

Team,

Please send the names to me, I'll consolidate and send to DJ. Need as soon as possible. Thanks, Paul

As part of the CPI that is currently being conducted, we will need a list of Subject Matter Experts (SME's) who will/shall provide a critical link in the process flow. These SME's are proposed to be the personnel in each respective work area who will "hold the key" to the integrity of your SOP's and JBS's. Whereas all of the specifics haven't been completely pinned down yet, it is crucial that we receive these names in order to prepare for our meeting with HQTRS regarding the CPI. With that said, could you please provide a list of 1 or 2 names per work area of individuals who you believe have the most knowledge of that area's processes? These individuals might be asked to teach fellow employees on new or existing JBS's, recommend changes of current processes, and/or assist in ensuring the processes are published and available to all work area employees.

Thanks in advance for your attention to this matter. If you have any questions, please reach out to me. X6095

In addition to their reputation as fine warriors, the Spartans were also known for the brevity and directness of their speech.

Shortly before Philip of Macedon invaded Laconia, he wrote a letter to the Spartans saying, "If I invade Laconia, I will drive you out." The Spartans wrote a one word letter back to Philip saying, "If."

Philip eventually entered Laconia and sent another letter to the Spartans asking whether they would receive him as a friend or a foe. The Spartans replied, "Neither."

Plutarch wrote that Spartans do not say much, but what they say grabs the listener's attention and they go straight to business .

Alcon,

On Tuesday September 13, 2016 at approximately 2000 an employee in CCP was moving material with MHE and backed into a safety rail protecting the cart key pad at spur 13 and broke it off. The employee reported the incident to a supervisor immediately. There was no injury to the employee. A CA-1 Form was not issued. The supervisor performed a visual inspection of the forklift and verified that there was no damage. The employee's MHE license was pulled pending further evaluation and training.

1. Time Lost - None.
2. Equipment Damage - yes
3. Safety Officer - Contacted by phone
4. ESAMS Report - PD14483
5. CA-1 - No.

Team,

As discussed in yesterday's meeting the following are the approved OT hours for Tuesday 6 September, I would highly recommend 4 hours before shift. Need to know your thoughts so that we can make arrangements for Police, maintenance and FOP's.

Receiving 100 Hours  
Storage 200Hours  
PacOut 200 Hours

Thanks,  
Paul

Subject: FMS TRANSPORTATION

Shane,

I spoke with James Catherman at 0955 hours this morning, concerning the truck transportation availability for the FMS materiel that we are staging at our outbound FMS doors, due to the non-availability of truck transport support to 53-1. . James shared with me that due to his floor being inundated with FMS materiel that still requires processing, four FMS transports are currently sitting currently on 53-1's docks, and will be turned around to Storage as soon as he can get the trucks on his door unloaded.

Best regards,

James C. Cammack

Subject: EMT call

I am asking all of you to please remind your supervisors, when they call the EMT's in the EDC, the FOP's should be the second people they call (channel 9 on the radio). So we stop loops and meet the EMT's at the door and take them directly to the employee of concern. We can also redirect the EMT's to a closer door if needed. Today we had a situation where the EMT's were called and we couldn't direct the EMT's in the right direction, so we had to drive around and hope to find the employee.

Thanks again  
Jason

Subject: DLA Distribution Weekly Update - 5 AUG 16

Sir,

This morning, we conducted the DLA Distribution Susquehanna (DDSP) Change of Command between COL Corey New and COL Brad Eungard. As you know, Corey has done a phenomenal job over the past three years commanding the largest distribution center in DoD. His focus on process improvement has been outstanding, but his focus on taking care of people has been particularly noteworthy. While we still have a way to go, the results of the culture survey for DDSP have seen marked improvement since the last report, showing as much as 50% improvement in many areas. Corey is a great leader who will be sorely missed by the enterprise as he retires within the next few months and we wish him and his family the best as they transition. COL Eungard is a great Officer with multiple combat deployments and most recently completed a fellowship at MIT's Center for Transportation and Logistics where he studied Supply Chain Management.

Next week, I will visit our Distribution Centers at Jacksonville, Warner Robins, Albany, Cherry Point and Richmond to gain an understanding of the unique challenges at each of their operations. While at each location, I will be meeting with key customers and logistics partners including the LOGCOM CG, the NAVSUP FLRCs, and I'll attend the Change of Command to WR-ALC.

This week's focus is PACOM:

Warfighter Support:

Iwakuni Detachment: DLA Distribution Yokosuka Commander had a very favorable meeting with Marine Corps Installation Command Pacific (MCIPAC) CoS and G4 team last week. They approved the ISA and we have begun staffing for final signatures. In the interim, the work order has been submitted to re-key building 1645 for DLA occupancy.

Support to the Rim of the Pacific (RIMPAC) exercise (Pearl Harbor): Support to RIMPAC has been outstanding as the exercise begins its final week and the beginning of the second in port period for afloat units. 50 reservists augmented DLA Distribution throughout the exercise providing seamless support. Through the third week of July, over 11k lines were processed in support of RIMPAC (750 of them CASREPS).

Ulchi-Freedom Guardian 16: Ulchi-Freedom Guardian 16 begins 16 AUG 16 on the Korean Peninsula and will run for approximately two weeks. DLA Distribution Korea will see an increased workload within TCSP operations during this exercise.

Yokosuka, Guam, and Pearl Harbor were green for all wholesale metrics in JUL. Pearl Harbor has made great strides in ensuring exceptional customer support during the RIMPAC exercise which is reflected on their APLs this month. Korea is meeting all APL's with the exception of RDO and Customer Return receipts. The site is prioritizing New Procurement and STO inductions ahead of other receipts. Leadership is hiring an additional receiver and authorizing Saturday overtime for to drive backlog down by the EOM Sept.

SDP: We will conduct the Distribution Supply Vessel (DSV) Proof of Principle (PoP) during Valiant Shield 2016 in the Western Pacific September 2016. San Joaquin will ship 90 NIINs in two Vidmar cabinets to DLA Distribution Guam for

onward movement to consignee, USNS WASHINGTON CHAMBERS (T-AKE-11). This PoP is a combined effort with the HQ DLA J3 Navy Team and our Distribution Centers.

FSG-80 Monthly Update: The FSG-80 Issue backlog at Susquehanna and Richmond is within standard. Performance at San Joaquin decreased with a shift of focus from Mission to CCP workload in MAY.

Amphenol Screenings: The fourth phase of screenings are in process. Tiger Teams deployed this week to DLA Distribution Warner Robins and DLA Distribution San Joaquin to assist with screenings. DLA Land & Maritime began clearing new vendors for specific NSNs and receipt restrictions are being lifted by NSN as screenings are completed.

#### People & Culture:

Workforce Planning and Programs: Today we graduated 65 DLA Distribution Norfolk supervisors and managers from the High Performing Leadership training. Per a recent graduate, "This is the best leadership training I have ever taken." As of today, 375 of DLA Dist supervisors and managers have completed HPL 1. On 8 AUG we start at DLA Distribution San Joaquin with 108 supervisors and managers. The East Coast and our Atlantic depots have all completed or are scheduled for the training and we are completing the West Coast / Pacific schedule.

Personnel Deployed: Distribution has 145 personnel (active, reserve and civilian) currently deployed or TDY in support of JLOC and DLA Distribution missions. Highlights:

- o FT Hood, TX BCT: Nine members of the Deployable Depot team from Red River are supporting FT Hood 1st Calvary 3BCT and 13th ESC the excess material turn-in mission in support of the Army. Mission end date is 6 August.
- o FT Polk, LA BCT: Nine members of the Deployable Depot team from Susquehanna and San Joaquin are supporting the excess material turn-in mission in support of the Army. Mission end date 10 AUG 16.

#### Strategic Engagement:

Salalah, Oman: As mentioned last week, we have awarded the Task Order Patricio Enterprises (PE) in support of MPC capability. Over the last week Patricio has moved out on phase-in tasks including initiation of hires, acquisition of force protection equipment, and IT preparation. We are on track for a 27 OCT 16 FOC.

#### Process Improvement:

Voice Pick Test / Development Meeting and Site Visit at San Joaquin: Our Team ICW HQ DLA Research and Development and DLA J6 will attend a planning meeting 21-23 AUG 16 with a potential vendor invited by R&D. Purpose of the meeting is to discuss development of a technical proposal to test voice pick technology at Distribution San Joaquin. Scheduling will follow receipt and approval of the technical proposal.

Pending any questions or guidance, this concludes my update.

v/r,  
John

Sent: Thursday, July 21, 2016 9:14 AM  
To: Martin, Tina M CIV (US) <Tina.Martin@dla.mil>; Brandon, Marcella M CIV (US) <marcella.brandon@dla.mil>  
Subject: FW: CV4L RCP Shipment Changes

Good morning ladies,

RCP (Recycle Consolidation Point) change of DODAAC. This might affect you guys so I'm shooting it out to you as a heads up. UY0029 used to be (Groveport, OH.) It is currently SZP101 and now all that was going to that DODAAC will be diverted to SSL001 which is the Lockbourne DODAAC.

\*\*\*\*\*☺\*\*\*\*\*

\*\*\*\*\*☺\*\*\*\*\* DDC/J4 \*\*\*\*\*☺\*\*\*\*\*

\*\*\*\*\*☺\*\*\*\*\*

Good morning All,

RCP property currently ships to SZP101 at Groveport, OH. There has been a change for certain sites to begin shipping to DODAAC SSL001 at Lockbourne, OH. From what I read the requisitions will drop with the new ship to DoDAAC.

The depots included in this change are:

Albany - DDAG  
Anniston - DDAA  
Cherry Point - DDCN  
Groton - DDGC  
Gulfport - DDJG  
Jacksonville - DDJF  
Norfolk - DDNV  
Richmond - DDRV  
Susquehanna - DDSP  
Tobyhanna - DDTP  
Warner Robins - DDWG

All,

Depots will now see DoDAAC SSL001 on A5A CV MROs going to Groveport, Ohio instead of SZP101 for new orders beginning this week. There are currently 2 correct shipping DoDAACs for CV4 MROs going to Ohio (SZP101 & SSL001).

Current CV4 MRO shipping DoDAAC list:

SSL001 (Groveport, OH)  
SZP101 (Groveport, OH)  
SZP102 (OKC)

Old CV3 shipping DoDAAC list:

UY0020 (Columbus, OH)  
UY0029 (Groveport, OH)  
UY0021 (OKC)

Subject: Fire Deficiency

Mr. Northrup,

I have attached a fire deficiency report for your review/action. This report was originally sent to Paul Finn

Bldg 2001 L01 west, debris under conveyors. clean out or arrange for contract to have cleaned out throughout all 2001 under the conveyor roller systems. small pieces of trash, plastic, pallet pieces, wood, dust and cardboard will(given an ignition source) ignite very easy.

Please let me know when action will be taken to mitigate this deficiency.

Respectfully,

Fire Inspector Riley

Subject: RE: REQ W58GTN62720057 / M777 Howitzer - NSN 5825015338812 / DLA Service Ticket Response (TKT # 8005207556)

Good Morning Patty,

Looking through the Army's LIW program this morning I noticed that Bagram has a \*\*\*second\*\*\* RADIO ENCLOSURE ASSY that was ordered the "Same Day" ( JD: 6272 - 29Sep16)

We've been looking for DOC# W58GTN62720057 (TCN: W58GTN62720057LXX)

**\*\*LIW shows a 2nd DOC#: W58GTN62720175 (TCN: W58GTN62720175LXX)\*\***

WEBVLIPS shows this 2nd DOC shipped from Ft Carson the **\*\*Same Day\*\*** (29Sep16)

As I mentioned in my research Yesterday, the FEDEX Tracking for W58GTN62720057 showed a PKG Weight of "95 lbs"...this is about **\*\*DOUBLE\*\*** the weight of "DSS Weight" Listed in FEDLOG for this item.

- Checking IGC, I cannot find any Tracking info for this 2nd Document / TCN. (DOC# W58GTN62720175 / TCN: W58GTN62720175LXX)

- 1) These May have Shipped together
- 2) Crate could be marked with this 2nd doc (W58GTN62720175)...or maybe not marked at all.
- 3) Attached Powerpoint has Pictures/Dimensions/Descriptions.

\*\*\*Note: The NSN is actually Marked on the inside of the "Access Door"\*\*\*

I would suggest Looking for a Crate with FEDEX Markings and FEDEX Tracking# ( 677919889989 )

If they shipped together, they probably set them "Side-by-Side" so the crate would be roughly double the Width or the depth.

Please Keep in Mind these are High Pri and should Ship by "Air" once located.

Hopefully, this will help Locate the material.

\*\*We Appreciate all your Support\*\*

Note: If this Package is marked incorrectly, please let us know (Pass along Pictures?) and we'll be certain to let AMC know. This has happened on more than one occasion and it is causing undue angst throughout the logistical pipeline.

Brad,

I apologize in advance for going back to the well so soon, but I need to get this situation resolved ASAP and you did so well last time that you, Patty and Mike are my "go to" team for Distribution challenges.

Please see below where we are trying to track down some critical (and expensive) M777 Howitzer parts for one of our hardest working units. Looks like they arrived at New Cumberland CCP on 3 Oct 16 and promptly fell off the radar. Attached are the tracking docs. Either they are lost in the CCP or they are moving and we haven't received and updated status.

Thanks in advance for your assistance in getting these parts to our teammates here in Theater. Don't 't hesitate to call me if you any additional information.

ATW,

COL Rick Ellis

Subject: REQ W58GTN62720057 / M777 Howitzer - NSN 5825015338812 / DLA Service Ticket Response (TKT # 8005207556)

Good Morning Sir,

Here's the email you requested if this M777 Howitzer issue was not resolved by this morning.

- NSN: 5825015338812 / RADIO ENCLOSURE ASSY is managed by B14 (TACOM - ROCK ISLAND)

- REQ W58GTN62720057 was submitted 29Sep16.

- B14 Routed the Doc to RIC: BXN (FT CARSON, CO) who pulled the item 29Sep16 and shipped 30Sep16

- It appears to have shipped under TCN W58GTN62720057LXX...via FEDEX (Tracking # 677919889989) Both the TRANSCOM IGC Database (Spreadsheet Above) and the FEDEX Database (PDF) show it arrived at New Cumberland on 03Oct16.

\*\*\*Note 1: I just pulled the FEDEX info today and it appears to have been signed for by an "S. Reed"

\*\*\*Note 2:

- Fedex Tracking info shows the Weight of the Package as "95 lbs / 43.1 kg"

- FEDLOG shows the "DSS Weight" of this item as "45.00" (I assume this is in lbs)

\*\*\*\*\*

The DDC Distribution Helpdesk TKT (Below) was created this past Monday.

-Mr Corey Stroman said he would be looking into it and get back with me.

- I followed up with Corey Stroman on Wednesday. At that time he said "...they were having problems locating the item. But he said they would be Pushing to find it".

- I've not received any further word.

Any Assistance you can provide would be greatly appreciate.

v/r,

016180992  
W58GTN62730462  
PRI 02/999/9GF

I've recently deployed to Bagram Airfield supporting 1st CAV and came across NIIN: 016180992. This 4ft Hescos are need to rebuild the Fuel Farm down at Shorab.

The customer dropped Requisition W58GTN62730462 (NIIN: 016180992 / 60 ea) on 29Sep16 and it went "BA" on 03Oct16...but there is no sign of movement since.

WEBVLIPS shows the order was routed to DEPOT: DDDE (SDQ).

- Is there any way to tell when this order will ship?
- Is there any way to tell which Mode will be used (Surface/Air)?

I know these are bulky items. Is there any way the customer can get these via Air (If slotted for Surface)?

Please get back with us as soon as possible so we can get word to the customer.

Subject: FW: REQ W58GTN62720057 / M777 Howitzer - NSN 5825015338812 / DLA Service Ticket Response (TKT # 8005207556)

Brad,

I apologize in advance for going back to the well so soon, but I need to get this situation resolved ASAP and you did so well last time that you, Patty and Mike are my "go to" team for Distribution challenges.

Please see below where we are trying to track down some critical (and expensive) M777 Howitzer parts for one of our hardest working units. Looks like they arrived at New Cumberland CCP on 3 Oct 16 and promptly fell off the radar. Attached are the tracking docs. Either they are lost in the CCP or they are moving and we haven't received and updated status.

Thanks in advance for your assistance in getting these parts to our teammates here in Theater. Don't 't hesitate to call me if you any additional information.

ATW,

COL Rick Ellis

Subject: REQ W58GTN62720057 / M777 Howitzer - NSN 5825015338812 / DLA Service Ticket Response (TKT # 8005207556)

Good Morning Sir,

Here's the email you requested if this M777 Howitzer issue was not resolved by this morning.

- NSN: 5825015338812 / RADIO ENCLOSURE ASSY is managed by B14 (TACOM - ROCK ISLAND)

- REQ W58GTN62720057 was submitted 29Sep16.

- B14 Routed the Doc to RIC: BXN (FT CARSON, CO) who pulled the item 29Sep16 and shipped 30Sep16

- It appears to have shipped under TCN W58GTN62720057LXX...via FEDEX (Tracking # 677919889989) Both the TRANSCOM IGC Database (Spreadsheet Above) and the FEDEX Database (PDF) show it arrived at New Cumberland on 03Oct16.

\*\*\*Note 1: I just pulled the FEDEX info today and it appears to have been signed for by an "S. Reed"

\*\*\*Note 2:

- Fedex Tracking info shows the Weight of the Package as "95 lbs / 43.1 kg"

- FEDLOG shows the "DSS Weight" of this item as "45.00" (I assume this is in lbs)

\*\*\*\*\*

The DDC Distribution Helpdesk TKT (Below) was created this past Monday.

-Mr Corey Stroman said he would be looking into it and get back with me.

- I followed up with Corey Stroman on Wednesday. At that time he said "...they were having problems locating the item. But he said they would be Pushing to find it".

- I've not received any further word.

Any Assistance you can provide would be greatly appreciate.

v/r,

Timothy (Tim) Nourse

CC: samuel.t.guy.mil@mail.mil  
Subject: NIIN: 016180992 / HESCOs for Shorab / W58GTN62730462NIIN:  
016180992  
W58GTN62730462  
PRI 02/999/9GF

I've recently deployed to Bagram Airfield supporting 1st CAV and came across NIIN: 016180992. This 4ft Hescos are need to rebuild the Fuel Farm down at Shorab.

The customer dropped Requisition W58GTN62730462 (NIIN: 016180992 / 60 ea) on 29Sep16 and it went "BA" on 03Oct16...but there is no sign of movement since.

WEBVLIPS shows the order was routed to DEPOT: DDDE (SDQ).

- Is there any way to tell when this order will ship?
- Is there any way to tell which Mode will be used (Surface/Air)?

I know these are bulky items. Is there any way the customer can get these via Air (If slotted for Surface)?

Please get back with us as soon as possible so we can get word to the customer.

v/r,
